

BugCount® Fuel Test Kit – 2nd Generation ATP®

Pack Size	Product Code
3 tests	50-30-10101
25 tests	50-30-10105

BugCount® Fuel is an industry-specific test kit designed for underwing use for testing fuel. BugCount® Fuel seamlessly blends the speed of traditional ATP tests with enhanced accuracy and sensitivity.

Requires [LuminUltra Photonmaster™](#).

Description

BugCount® Fuel is available for use in **single-use packaging for under-wing applications**, or as a bulk option for large-scale lab use.

BugCount® Fuel is ASTM D7687 compliant and ATP photometry is a listed method for testing fuel and fuel-associated waters in the latest 6th Edition of the IATA Guidance Material on Microbial Contamination in Aircraft Fuel Tanks Appendix A.

Features

- No lab, specialized personnel, equipment or skills are required to run the test
- Easy-to-follow instructions
- Results available in just 5 minutes
